

MODULE 1

# Named executive sponsor and agreed mandate position

Leadership & the Investment Case

Workshop deliverable · template

## Purpose

Move AI-assisted development from optional experiment to a position the organisation has actually taken — with a named sponsor accountable for it. Agree the mandate position and record the sign-off below.

## Mandate position — pick one

| POSITION   | WHAT IT MEANS                                                            | SIGNAL TO THE ORG                                      |
|------------|--------------------------------------------------------------------------|--------------------------------------------------------|
| Optional   | Tooling available; use is a personal choice.                             | "You may." Adoption stays organic and uneven.          |
| Encouraged | Leadership actively promotes it; budget allocated; still voluntary.      | "We want this." Momentum builds but no accountability. |
| Mandated   | The expected way of working; tooling provided and supported; KPIs exist. | "This is how we build." Adoption becomes measurable.   |

## The sponsor's role

- › Owns the mandate and defends the budget when it's challenged.
- › Unblocks procurement, security sign-off, and access.
- › Holds the metrics scorecard and reports ROI to the board/PE.
- › Names the first squad for the 8-week prove-it.

## Sign-off

| FIELD                           | AGREED                           |
|---------------------------------|----------------------------------|
| Executive sponsor (name / role) | _____                            |
| Mandate position                | Optional / Encouraged / Mandated |
| Scope (teams / engineer count)  | _____                            |
| Date agreed                     | _____                            |
| Review cadence                  | _____                            |
