

MODULE 4

A hybrid team operating model and handover plan

People & Change

Workshop deliverable · template

How D55 + your people work as one squad

The operating model the 8-week embed embodies: a single hybrid squad, with a deliberate split of work and an explicit handover so the client is self-sufficient when D55 exits. This is what makes the exit real.

The hybrid squad

One squad, one backlog — not a vendor working alongside.

Handover plan

CAPABILITY	OWNED BY D55 AT START	OWNED BY CLIENT AT EXIT	TRANSFER MECHANISM
AI tooling & config	D55 sets up	Client maintains	Docs + pairing
Spec-first delivery	D55 models	Client-led	Coaching + review
Guardrails / governance	D55 drafts	Client owns	Policy + checklist (Module 3)
Metrics & ROI	D55 baselines	Client reports	Scorecard handover (Module 1)

The exit test

D55 embeds, proves, enables — then leaves. The handover is done when the client runs the model without us and the manual is theirs.
