

MODULE 4

A middle-layer role-shift plan

People & Change

Workshop deliverable · template

The shift

When devs go faster, coordination roles become the constraint. Redefine them around specification and intent — the same shift the delivery lifecycle needs (Module 2), planned here from the people angle.

Who moves where

PERSON	CURRENT ROLE	REDEFINED ROLE	SUPPORT NEEDED
—	Product Owner	Spec owner	Spec-template coaching
—	Business Analyst	Requirements-prompt engineer	Contract-first training
—	Delivery / PM	Flow & dependency manager	New cadence + metrics

Sequencing

- > Name the people, not just the titles.
- > Pair each with a champion during the transition.
- > Make specs a first-class, reviewed deliverable.
- > Review pace after 4–6 weeks; adjust.
