

MODULE 4

An upskilling / onboarding path

People & Change

Workshop deliverable · template

Goal

A real AI-first learning path so new joiners are productive in days, not weeks, and existing staff level up deliberately — not by osmosis.

The path

STAGE	OUTCOME	HOW
Day 1	Working standard config + first AI-assisted PR	Shared config (Module 2) + buddy
Week 1	Writes AI-consumable specs	Spec template + review
Weeks 2–4	Effective daily flow; knows the guardrails	Pairing + Module 3 policy
Ongoing	Continuous skill evolution	Skills library, brown-bags, champions

Non-engineers too

POs, BAs and QA use AI in their roles as well — the path isn't developer-only. That's what makes it a culture, not a tools rollout.
